Reflector Director™

MADE BY SQUIRRELS

 getreflector.com  @reflectorapp

EXPERIENCE A NEW WAY TO CONTROL REFLECTOR.

Step away from the front of the classroom and stay in control of what's shown to students. Reflector Director gives you the same control you would expect when you're tied down to a computer. Allow mirroring to become part of the environment, and keep the spotlight on the content that matters most.

SHOW AND HIDE DEVICES

Hide student devices without completely disconnecting them. The device never disconnects so there's no need to reconnect when you want to show it again.

EMPHASIZE DEVICES

Spotlight one device to share important content or action. Easily bring screens to center stage for emphasis, and eliminate distractions with fullscreen mode.

APPROVE MIRRORING REQUESTS

Ask students to connect, and approve their mirroring requests right from your iPad. Keep focus on the students and away from technology.

PREVIEW SCREENS

Allow multiple students and devices to connect simultaneously to Reflector, and monitor a preview of each device as it's shown on the big screen.

AVAILABLE ON THE APP STORE AND IN THE APPLE VOLUME PURCHASE PROGRAM
